Dear Families

Pride Month

This month is Pride Month and the Suffolk Pride March was in Ipswich last weekend. It got me thinking about how our next steps are so linked to who we are and how we see ourselves that it seemed pertinent to address this with our LGBTQ+ community in school in this edition of the newsletter.

Students who identify as part of this ever more wonderfully colourful and diverse group of people struggle to connect with who they are or feel like they can't access their true self due to discrimination or fear of such.

Throw into the mix the frightening concept of leaving school and making choices around what career direction they may take can feel so overwhelming.

In order to support these students, I have written up 4 key career tips for LGBTQ+ students, as highlighted by Forbes 2018.

Research indicates that 46% of LGBTQ+ employees have not revealed this identity to co-workers.

In order to create an environment where employees are more committed to and satisfied with their job, it is imperative that the workplace allows employees to be their authentic selves.

Find a job that welcomes your full self: When searching for a job, it is important to conduct thorough research on the companies, to have a deeper understanding of the organisational values. Have conversations with past and current employees. Would you really want to work for a company that does not accept you for who you truly are?

Find community at work: There is a lot of value in creating a network of friends and allies in the workplace. If your organisation does not have an LGBTQ+ employee resource group, you can be the one to spearhead it

Communicate with and educate your co-workers: In the process of developing an LGBTQ+ -inclusive workplace, evaluate the diversity and inclusion training that takes place. Is the training up-to-date when it comes to relevant LGBTQ+ issues? Create a dialogue with your employer regarding modifications and improvements to the current training that can be done.

Lean on your external community: It is a valuable practice for you to also connect with the LGBTQ+ community outside of your workplace. Connect with other LGBTQ+ individuals as well as allies via Facebook, LinkedIn, Meetup, and your other personal and social networks. Having a network full of supportive individuals and other LGBTQ+ professionals can aid in the job-search process, and particularly in the search to find an inclusive organisation, and you can utilise these connections for career advice and guidance.

Where are they now?

This week we focus on Oliver Manser who attended Stowmarket High School from 2004 - 2009

► **What have you been doing since school and where are you working now?**

I have been working for Asda at various stores across the country and am now Manager at Stowmarket Store.

► **What is your fondest memory of Stowmarket High School?**

Fondest memory of Stowmarket High School - Mr Carpenters English lessons!

► **What was the best bit of advice you ever received from one of your teachers?**

Best bit of advice I received - you get out what you put in. Didn't appreciate it at the time but very true out in real life.

► **What advice would you give your Year 7 self now?**

Advice to my year 7 self - just enjoy school. Don't sweat small stuff, nothing is really that bad and don't compare yourself to others.

► **What were your favourite subjects at school and how have they helped you in your job today would you say?**

My favourite subjects at school were English and business studies. Being able to articulate and form conversations and discussions are important in my role as I have to communicate with so many different people. Being able to balance conversations and analysing information is important also. Business is most relatable now to my role but is taught at a very headline level which helped me to understand terminology used.

► **Shout out to anyone in particular?**

Shout outs would be Mr Carpenter, Mr Maz in Physics, Mrs Frankland who taught French and Mrs Maz in the 6th form who may or may not still be there.

careers in the curriculum graphics

Last Wednesday our Year 10 and Year 11 Graphic Design Students were treated to a visit from Ogi Damyan, Director of O-Worlds and a specialist in the graphics, art, animation and VR fields.

Ogi, visited both groups and showed them a project he has recently been working on as a specialist in graphics, art, animation and virtual/augmented reality. After watching his impressive work, he continued to support our students by highlighting how the world of virtual and augmented reality is starting to become increasingly popular and the demands for designers is going to surge as more and more applications for this technology grow.

He also introduced our students to the term Metaverse, a virtual world of limitless possibilities where people can connect, work, play and much more, facilitated by the use of virtual and augmented reality headsets.

Ogi was open to answering any of the questions our students had, who were keen to know more about his general working

arrangement, how he got into the career in the first place, and how designing in a virtual reality world actually works. They were also intrigued to discover how they might start experiencing more virtual and augmented reality in the future too. Overall, our students benefitted hugely from Ogi's visit which was really inspiring and helped gain an insight into graphic design opportunities in the future. He hit a real chord with a handful of students too who expressed an interest in developing some of their own work and ideas with a variety of free software packages he recommended we experiment with.

The benefits of this software may also have the potential to be experienced by some of our other students in the future too. Look out for CAD Club

in the new school year where students can come to develop their skills and knowledge across a variety of software packages helping them to complete work from lessons or start designing and developing their own virtual worlds, computer games, and visual effects.

We plan on keeping in touch with Ogi so our students can continue to experience how the world of graphic design is evolving and help them to discover their place in it.

A definite Futures win!

Mr Adam Duszynski
Subject Coordinator for Graphic Design & Engineering

Stowmarket Glass Company

- Est 1987 -

Local Apprenticeship Opportunity Trainee Fitter

Stowmarket Glass

(They do not fit windows!)

The position would entail onsite training for the first 6 months until the applicant was able to pass NVQ1. This would then enable the trainee to attend larger sites.

The position would be from our Stowmarket factory and traveling to jobs all over the South East of England.

Over the 2nd and 3rd year the applicant would need to pass NVQ2 and NVQ3 along with CSCS.

The hours are 07.30 - 17.00 Monday - Friday
The Starting wage would be £18,000.00

The applicant needs to be able to work with other trades on site and also converse with customers.

If you are interested in this opportunity. Please contact Mr Paul Browes, Direction in the first instance at paul.browes@aol.com

The Suffolk Food Museum are looking for some young people who would like to volunteer and get some work experience with them over the summer with the thrills and grills outdoor cooking programme.

mock interviews

On Thursday we had mock interviews for the Year 10 E4L group. Ellie Godbold from Neaco took them though their paces, where they had to apply for a job and interview in a role play scenario to mimic the real experience.

Ms Ferguson commented

"the students were very apprehensive about the experience, but all thoroughly enjoyed it when they returned to the classroom. This sort of activity is vital in supporting their confidence and self-esteem".

Sign up sheet can also be found on the board outside the LRC office

What they used to do

We sit down this week with Mrs Lucy Brewster, Head of Food & Nutrition

▶ What did you use to do before you worked at Stowmarket High School?

My first job was working on the boats on the broads getting them ready for holiday makers. When I was doing my A-levels I continued at the boat yard and worked in Next. I loved my time in both of these jobs and continued at Next through university too.

The summer after university I worked at a children's holiday camp, which was an interesting experience but also lit the idea in my head for teaching. For a few years I ran my own textiles business making and selling knitwear which led to being a merchandiser.

I then trained to be a teacher 3 years after finishing university and worked in 2 other schools before Stowmarket High.

▶ What did 10 year old you want to be when they grew up can you remember?

Not sure.

▶ What was the best bit of advice you ever received from one of your employers?

To always have a pen with you?

▶ What advice would you give your Year 7 self now?

That you don't have to know what you want to be, I didn't but I picked a subject I enjoyed and followed that path. In year 7 I never dreamt I would be a teacher now.

▶ What were your favourite subjects at school and how have they helped you in your job today would you say?

Textiles all the way. I loved it and still do. Even though I teach far more food it is still a huge passion of mine.

▶ What is your career highlight to date?

Never falling off a boat into the broads, and I worked there for 8 summers!

▶ Any career low points or comedy moments that stand out?

Serving Christmas lunches in BHS (a job I didn't mention above) with two left hand heat proof gloves as they couldn't find me a right one!

Stonewall Young Futures

This space was made with LGBTQ+ young people, for LGBTQ+ young people. Whether you know exactly what you want to do with your future, or it feels like you have no idea yet feel free to explore and get inspired.

Scroll on the website to look at different options, learn about new opportunities. You can also hear from other LGBTQ+ people about the choices they made, the paths they took and how they got to where they are today:

<https://www.stonewall.org.uk/young-futures>

careers in the curriculum engineering

Earlier this week our Year 10 Engineering students were visited by Josh Finbow, Sub Agent & Regional Engineer from Jackson Civil Engineering, a local engineering firm that specialise in developing highways and flood defence solutions over much of the United Kingdom including the development of the new Gateway 14 facility being built in Stowmarket. What was also fantastic is that Josh is a past student of Stowmarket High School and was keen to talk to students about his experiences within the industry and why he would encourage others to do the same.

Josh was keen to find out what routes our students were considering following the completion of their GCSE's. Initially, a small number expressed an interest in studying at university, with others more focused on going to college or studying A-Levels at this stage. Following some further discussion outlining Josh's own experience, many of our students were keen to hear about the work experience and apprenticeship opportunities available at Jackson that could help them learn and earn and potentially also obtain a degree.

More information can be made available for anyone who is interested in exploring this opportunity further. Please feel free to contact myself a.duszynski@stowhigh.com or visit the Jackson website at www.jackson-civils.co.uk or contact our futures coordinator Mrs Mylrea on m.mylrea@stowhigh.com

After a short video showing the students the type of projects Jackson have worked on,

Josh took the class outside and introduced them to some of the equipment he uses on a regular basis. This provided our students with some insight into the types of work he would commonly be doing, its purpose and significance in helping to achieve getting large scale engineering projects started and off the ground.

Despite a couple of technical issues meaning the students could not collect data with the GPS device, they were able to use the dumpy level, a device used to determine landmass formations and elevations. Josh was able to explain how this type of work would have been essential for the construction firm that built the school to carry out to ensure the land was level and the corners of the build were in the right place prior to construction starting. Overall it was a fantastic opportunity for our engineers to see where their skills from the subject could take them in the future and discover the range of career routes that are available. Josh will be visiting

the school again soon with another one of our engineering groups and hopes to have more success with the equipment allowing our students a more authentic experience. So, watch this space to see what they get up to.

Adam Duszynski, Subject Coordinator for Graphic Design & Engineering.

Calling all Year 11 students who perhaps are still unsure of their education choices for September 2022 due to the uncertainty of their GCSE grades.

We would be delighted to hear from students in terms of any female or male students who may be suited to our course on offer here at Portman Road, below, I am delighted to provide some of the benefits of our programme.

Ipswich Town Football & Education Students will be based full time at Ipswich Town Football Club, Portman Road, from September 2022 through our education provider

SCL Education. **INFO** 

We can offer our students the opportunity to study alongside a full-time football programme; all of which follow a carefully planned pathway of modules to provide our students with a broad range of knowledge and experience whilst remaining linked to potential career pathways in sport at Ipswich Town Football Club and our partner businesses.

- NCFE Level 3 Extended Diploma in Sport & Physical Activity.
- BTEC Level 3 Extended Diploma in Business.

Both courses being the equivalent of 3 A-levels up to 168 UCAS points
Numbers for our programme are limited, with students needing to meet the entry requirements of 4 GCSEs at grade 4 or above to include Math's and English to be accepted first and foremost, with football levels also being assessed to ensure we are going to be able to compete at the highest level for the leagues identified for their chosen programme against the likes

FOR YOUR FUTURE**

of Chelsea, Swindon, Fulham, Colchester, and Stevenage.

Unlike other schemes where players are tied to that club, our Football & Education programmes looks to complement existing grassroots football provision and allow players the freedom to continue playing for their current teams. However, with the creation of a U18 Junior Premier League Warriors team for the girls and possible of the same for the boys it is a very exciting time for the programme.

1. The education aspect is delivered by SCL Education teaching staff at an exceptional level with high expectations.

2. The football coaching is taken by UEFA qualified and experienced Ipswich Town staff who will provide a professional environment for which the players to work in.

3. Numbers on the programme are limited so we will be looking to recruit the best student athletes available to us to be competitive and represent Ipswich Town FC accordingly.

4. Players represent Ipswich Town against professional clubs and representative sides providing players with the opportunity to exhibit their capability to scouts and coaches.

5. The football club will provide behind the scenes visits to Portman Road and Playford Road Training Centre along with hosting seminars and speeches delivered by past and present staff.

6. Thanks to the flexibility and in depth offering of the course students also can move on to university to study a vast array of degrees if they wish and/or career progression in a variety of different roles.

7. Sports Therapy support provided by qualified staff and University of Essex Year 3 Sports therapy students

Yojo

Yojo is a new app
created by The Children
& Young People's
Engagement Hub at
Suffolk County council
which helps young
people in Suffolk find
apprenticeships and
explore career paths.

It has many features, such as the
develop section which delivers
guidance in creating a CV, the
contact section which helps
signpost people to find support
in areas that they need, and the
search section which shows
current vacancies based on the
persons interests.

For more details about the Yojo
App visit www.yojoapp.co.uk

Please visit www.stowhigh.com to see our school
