14 December 2023

Dear Families

Year 11 GCSE Mathematics

The recent PRE exams form part of our structured plan to help your child enjoy success in their GCSE exams in Summer 2024 and we hope that they have found the experience both helpful and informative.

To further support this success, we have created a Personal Currency Plan (PCP) in Mathematics for your child. This PCP highlights your child's specific strengths and areas of development, by topic, based on their performance in the PRE exams across all their Mathematics papers.

Your child should be given their PCP by their Maths teacher on Thursday or Friday of this week and are being advised to take them home. I encourage you to ask your child about their Maths PCP so that you can discuss the strengths and weaknesses, along with your how child could work independently to address their areas for development over the next weeks ahead of the Spring Term PRE exams.

At school, we will continue to run our weekly Maths Success sessions on a Tuesday after school, we will share the details of specific topics for each week to help guide which sessions should be attended. Your child also has full access to MathsWatchVLE which is an online platform to help learn, revise and practise specific topics. We also recommend using the websites MathsGenie (no log in required) and OnMaths (registration required) as there are lots of topic specific exam papers on there for your child to access and work through. The school has also purchased a subscription for GCSE Pod which will be launched with students after the Christmas break – this can be used across all GCSE subjects which your child may also find helpful for their Maths revision.

For some students, we will also organise additional support sessions but we will contact students and parents directly about this.

As always, we are grateful for your continued support, and we know just how demanding these next few months can be. If you wish to discuss your child's mathematics or how we can further support them, please contact your child's maths teacher either by email or on the school number.

Wishing you a lovely Christmas break.
